

Uzbekistan uses energy storage equipment to charge at night

Overview

Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 — The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

How can Uzbekistan meet its energy needs?

Uzbekistan is capable of meeting its energy needs from its own energy resources. Uzbekistan owns a significant part of the installed capacity of the united power system of Central Asia.

Who will sell electricity to in Uzbekistan?

The project company is committed to selling electricity to the state-owned National Electric Grid of Uzbekistan JSC under a 25-year Power Purchase Agreement for the project, including a 10-year operating term for the BESS component, signed by these two entities.

What are the main activities of Uzbekistan Electric Company?

The main activities of the company are the operation and development of the main electric networks of the Republic of Uzbekistan, the supply of electricity through the main electric networks and the implementation of interstate transit, cooperation with electric power systems of neighboring states. Map diagram of the main electrical networks.

How will Uzbekistan improve its energy security?

"This project will enhance Uzbekistan's energy security through the use of innovative solutions and technologies," noted Marco Mantovanelli, World Bank Country Manager for Uzbekistan.

How does the World Bank help Uzbekistan?

These efforts support the country's clean energy transition and decarbonization, as well as its economic growth. In this context, the World Bank Group is helping Uzbekistan develop 2,000 MW of solar and 500 MW of wind energy by attracting private sector investments.
