

Venezuela photovoltaic power generation module prices

Overview

How much solar power does Venezuela have?

According to the latest statistics published by the International Renewable Energy Agency, Venezuela had around 5.32 MW of installed solar PV power generation capacity in 2019. In 2019, the Venezuelan government announced a plan to build its first utility-scale PV project to strengthen its National Electric System.

Should Venezuela be filled with photovoltaic panels?

Venezuela should have been filled with photovoltaic panels a long time ago. But the electrical emergency is opening up a small path for this energy source, and the state hasn't taken advantage of this technology yet.

How much wind power does Venezuela have?

At the end of 2019, Venezuela held 71.28 MW of installed wind capacity, a much higher capacity compared to the solar PV installed capacity as of 2019. Venezuela is also planning to build wind farms with a generating capacity of 10,000 MW over the next 15 years.
