

Western European Industrial Park Energy Storage Franchise

Overview

What is the European energy inventory storage dataset based on?

Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or input provided by the EC or any of its authorised 3rd party contributor.

Which country is promoting the development of residential energy storage?

In terms of residential energy storage, the Polish government has launched Moj PRD 5.0 subsidy program to encourage the development of residential energy storage. Sweden's installed battery storage capacity is expected to grow from 503 MW in 2023 to 3.8 GW in 2030, with high revenue levels in the ancillary services market driving the market growth.

What is the future of energy storage in Ireland?

Future market potential is concentrated in pre-sheet energy storage and energy storage co-located projects, residential and commercial storage market space is not large. Ireland's battery storage capacity is expected to grow from 792 MW in 2023 to 3.9 GW in 2030, mainly in the pre-table storage market.

What is the future of energy storage in Norway?

Norway's poor lighting conditions, residential PV and energy storage development are limited, the future market may mainly focus on the outlying island microgrid. Spain will install 242 MW of energy storage in 2023 and is expected to increase to 5.8 GW by 2030.
