

What are the energy battery cabinets at sites in Finland

Overview

These containers serve as battery storage units, available in various sizes, often resembling a box placed atop a concrete base. Their presence has rapidly increased across several municipalities, with ongoing processes for permits or planning solutions in many areas. Where is the largest battery energy storage system in Finland?

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage system (BESS) in Nivala Municipality, Northern Ostrobothnia.

Is a battery storage project a good investment in Finland?

It is a very good complement to our renewable project developments in Finland," says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest – by far. Despite the size of the undertaking, the project has proceeded very smoothly indeed.

Why is Yllikkälä a key project for Neoen?

Following the development of the Hedet and Mutkalampi wind farms, Neoen is making yet another big push in the renewable energy market with the addition of the new battery storage unit. "Yllikkälä is a key project for our company, being the largest of its kind for us in Europe.
