

What are the manufacturers of outdoor wind power base stations in Laos

Overview

What is the monsoon wind power project?

The 600MW Monsoon Wind Power Project is a landmark initiative, featuring a 500kV transmission line that links Laos to Vietnam. It is slated for completion by 2025. As the first wind farm in Laos and the largest in Southeast Asia, Monsoon has set a new benchmark by securing a bankable cross-border Power Purchase Agreement.

Who visited the monsoon wind power project in Lao PDR?

Lao PDR's President H.E. Thongloun Sisoulith, Secretary General of the Central Party Committee, visited the Monsoon Wind Power project, where he was welcomed by Mr. Nat Hutanuwat, CEO of the Monsoon project, and Mr. Peck Khamkanist, IES CEO.

Where is the monsoon wind farm being developed?

The Monsoon wind farm is being developed in the Sekong and Attapeu provinces of Laos. Credit: Mitsubishi Corporation. Construction of the Monsoon wind farm commenced in April 2023. Does Vietnam have a wind farm?

The electricity generated by the wind farm will be supplied to Vietnam under a 25-year power purchase agreement signed between IEAD and Vietnam Electricity in 2021, which was amended in January 2022. The plan for importing power produced from the wind farm to Vietnam's grid was approved in July 2022 by the prime minister of Vietnam.

How many wind turbines are in the monsoon project?

The Monsoon wind project will feature 133 EN-171 onshore wind turbines. Each EN-171 wind turbine will generate 4.51MW of electricity and will have a

rotor diameter of 171m, a hub height of 110, a swept area of 22,965m² (247,193ft²) and a blade length of 83.9m.
