How much does an inverter cost?

At the average \$0.18 per watt and with the average installation costing \$2.93 per watt, inverters usually account for about 6% of total installation costs. This means that a typical 5.6-kilowatt installation costs \$16,408 in total and the inverter should account for about \$1,000 of that.

What is a solar inverter?

A solar inverter is a key component of a solar power system that converts the electricity generated by solar panels (DC – Direct Current) into usable electricity (AC – Alternating Current) that powers your home or business. With technology advancing rapidly, 2025 has brought a new wave of efficient,

reliable, and smart solar inverters.
