

Where have always bought solar power generators for home use

Overview

We rated and reviewed the best solar-powered generators for home backup during power outages, including models from Generac, Jackery and more.

Should I buy a solar generator?

If the primary cause of power outages where you live are wildfires or hurricanes, or other summer events, I would recommend looking at solar generators. If the primary cause of power outages where you live are winter storms, then you will likely be better off with a larger power station. Read Next: What Can a Solar Generator Power.

Can a solar generator power a home?

A few years ago, solar generators were mostly good for camping and charging your phone in emergencies. Now, you can find a solar generator that can power your entire home. In fact, you can find a solar generator that's perfect for your specific application whether it's home backup, camping, RV or off-grid living.

Should you buy a power station or solar generator for home backup?

One of the most common reasons people purchase a power station or solar generator for home backup is to ensure everything in their refrigerator stays cool. However, refrigerators have unique power needs compared to other electronics, so it's essential you double-check your unit's requirements before making a final purchase.

Can a solar generator power appliances?

If you want a solar generator that can power appliances whether it's at home, in your RV, offgrid or anywhere else, our top pick is the Bluetti AC200L. It can power just about any appliance, has plenty of outlets to run multiple appliances and features expandable capacity so you can fit it to your needs. Can power most household appliances.

Do you need a solar generator for home backup?

With climate disasters on the rise, the need for a solar generator for home backup is more acute than ever. But, for most of us, this is new territory and it can be difficult to unpack what your power needs are and how much budget you need to build an effective emergency setup.

Can a solar generator be used outside?

There is a fundamental contradiction at the heart of most solar generators. They are designed to be used in indoor spaces, and can be quite sensitive to wind, rain, and even sun. But to recharge them with a solar panel, you'll need to leave them sitting outside for a few hours.
