

Which Argentine communication company has the most 5G base stations

Overview

How many cities in Argentina have 5G?

At the end of 2017 it had 71% coverage of population in over 1000 towns and cities. Telecom Argentina which owns Personal has announced that its mobile unit Personal has activated the first 5G network in Argentina, launching a total of ten mobile antennas in the cities of Buenos Aires and Rosario.

Which Argentine telco has a 5G network?

Telecom Argentina became the first Argentine telco to deploy 5G network in the South American country, putting into operation ten mobile antennas that enable using this service through DSS (Dynamic Spectrum Sharing) technology.

Which country has a 5G network in Buenos Aires & Rosario?

Telecom Argentina which owns Personal has announced that its mobile unit Personal has activated the first 5G network in Argentina, launching a total of ten mobile antennas in the cities of Buenos Aires and Rosario. The five mobile sites in Buenos Aires were deployed by Huawei, while the Rosario infrastructure utilises Nokia technology.

Will 5G be available in Argentina in 2021?

Operators have trialled 5G though given the continued capacity of LTE infrastructure it is unlikely that commercial 5G services will be available before 2021. Argentina has 3 national operators: Claro (by América Móvil), Movistar (by Telefónica Spain) and Personal (by Telecom Argentina). They three all have about the same market share.

Who can access 5G cell sites in Argentina?

The 5G cell sites can be accessed by any Personal subscribers with compatible handsets. Argentina's National Communications Agency (Ente Nacional de Comunicaciones, ENACOM) has confirmed that it will stage a week-long 5G

trial at its headquarters in Buenos Aires this month.

When will 5G spectrum be available in Argentina?

The Argentinian government announced that it will carry out a 5G spectrum auction in February 2023. Spectrum suitable for 5G use, as identified by ENACOM (Argentina's National Communications Agency), includes the 1.5 GHz, AWS-3, 2.3 GHz, 3.5 GHz, 26 GHz, and 38 GHz bands.
