

Which kind of outdoor power supply is better in Türkiye

Overview

What types of electrical outlets are used in Turkey?

In this article we've listed the latest information on the types of electrical outlets, voltages and frequencies used in Turkey. Turkey uses two plug and socket types – C and F. Other countries that share these types of plugs are Estonia, Finland, Georgia and most of Europe.

What type of power socket do you use in Turkey?

I enjoy learning language, great food (chicken kebab is a favourite at the moment) and experiencing places less-traveled. The power plug type used in Turkey is type C and F. Power sockets provide 230 volts of electricity and run on a frequency of 50Hz.

Does Turkey have a 220 volt power supply?

This means you do not have to worry about getting shocked or damaging your device. The supply voltage in Turkey is 220v and at a frequency of 50Hz, which is the same as in most European countries. If you're coming from a country that uses a different voltage, such as the USA or Canada, you'll need to make sure your appliances can handle 220v.

What voltage does Turkey use?

Turkey uses outlet types C, F at a voltage of 230V and a frequency of 50 Hz. Plug Compatibility: Type C, Type F Voltage: 230V Frequency: 50 Hz Can North Americans use Electronics in Türkiye without an Adapter?

No! North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Türkiye.

Do I need an adapter to use electronics in Türkiye?

No! North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Türkiye. North Americans device plugs will not

work with the outlet types in Türkiye. Also, the voltage in Türkiye is different from North American voltages. Can Europeans use Electronics in Türkiye without an adapter?

Yes!
