

Which solar inverter to choose

Overview

How do I choose the right solar inverter?

To find the right solar inverter or inverters for your installation, you must consider several specific features of your property, including your energy demand, roof complexity, and whether shading will affect your system's performance. Learn more about solar and shade.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

What are the different types of solar inverters?

For instance, a microinverter system can increase energy output by up to 25% in partially shaded areas. String inverters connect a series (or "string") of panels to a single inverter. These are the most common type used in residential and commercial solar systems.

Do I need a solar inverter?

Solar inverters are the operational brain of photovoltaic (PV) systems, making them one of the most important components of a solar system. Since solar panels generate power in DC, which is not useful for most home appliances, you will generally need a solar inverter.

Is a solar inverter a converter?

A solar inverter is really a converter, though the rules of physics say otherwise. A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes.
