

# **Which telecom company has the most photovoltaic sites in Palau**

## Overview

---

How much solar PV is needed in Palau?

The results show that on top of the 2.5 MW of solar PV currently present in Palau, an additional 83 MW of solar PV and 20 MW of wind turbines would be required for such a system. Furthermore, this scenario would necessitate a battery storage system of 168 MWh and battery inverters of 34 MW.

Does Palau have a renewable power system?

The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%). With more deployment, however, the share taken by renewables could potentially increase to more than 92%. This corresponds to the lowest average system LCOE.

What is the current power system in Palau?

**CURRENT POWER SYSTEM** As mentioned previously, the current power system of the Republic of Palau is widely dominated by conventional fossil fuel generation. The calibration model developed has shown that currently, renewable energy generation represents only 4.03% of the total share of Palau's power sector.

How many power plants are there in Palau?

Currently, there are a total of five main power plants on different islands in Palau, supplying electricity to meet the load. The two largest power plants are the Malakal and Aimeliik power stations, which have total generation capacities of 15.5 MW and 10 MW respectively.

Which power stations are located in Palau – Malakal & Aimeliik?

The roadmap analysis focuses on the two main power stations – Malakal and Aimeliik – as they are located on the two largest islands – Koror and Babeldaob. For this study, it was assumed that the total diesel generation

capacity of Palau's current power system is 20 MW (the four largest generators present in Palau).

Why is technology so important in Palau?

"It's not just about advanced technology; it's about bringing people together, connecting our remote islands, and increasing resilience for the entire nation," says Simon Fraser, CEO, Palau National Communications Corporation.

## Which telecom company has the most photovoltaic sites in Palau

---

### Most cell sites are back up and running, say telecom providers

Local telecom companies are reporting that most of the island's cellular sites are now back online and customers should see mobile connections beginning to improve.
